

PDM-S1203 Stage Mixer 12-Channel DSP/MP3- USB IN/OUT

The professional PDM-S1203 12-channel Stage mixer is a product in a series of high-quality stage mixers. Equipped with a DSP effects processor, USB in / output for easy connection with computer for music recording, stereo 9-band equalizer, etc. Each channel has a 3-band tone control available (in stereo mode a 4-band) and a rotary knob to adjust the crossover frequency. The high level of pre-amps ensure that the sound quality is maintained and that the sound is dynamically produced optimally. Other useful features are available to create a perfect mix. This stage mixer is ideal for mobile applications, even when used intensively. Very suitable for a.o. bands, on stages and in studios.
