VSA700-BP Portable System 15" 1000W Combi

The Vonyx VSA serie is a serie high-quality professional 12" and 15" portable audio systems. The built-in amplifier unit is equipped with a BT receiver that allows streaming of all your favourite music from a smartphone or tablet and a USB port/SD slot for MP3 playback. In order to always be clear what is currently being played, these audio systems have a clear graphic display for displaying ID3 tags. Thanks to the built-in rechargeable battery, these systems are perfect for applications such as PA and street performances. The VSA systems also includes 2x UHF microphones for complete freedom.

The rear panel of these systems offers plenty of connectivity, versatility and functionality. It includes a microphone input channel with a 3-pin XLR combo input, an Aux-line input, controls for tone adjustment, a Mp3 control unit and a battery indication section where you can easily check the status of the battery. It also offers both a Line In and Line out using an RCA jack. Here you can connect audio units with line-level output such as a mixer or other external device. Finally, there is a dedicated section to control two channels of UHF wireless microphones independently. Everything is enclosed into a single heavy duty enclosure, with roller wheels and a pull-up handle to assist with transport.

Product colour : Black
 Playback options : BT 5.0 streaming, USB, SD
 Speaker type : Active (amplified)
 Output power: Max : 1000W
 Output power : 500W
 Battery : 12V - 7.2Ah
 Frequency response : 45Hz - 20.000Hz
